

LED UNDERWATER LIGHTS - INSTALLATION

1. LED Underwater Lights - Recommended Splicing Options

DBRY-6 Direct Bury Splice Kit

With any low voltage lighting system, waterproof connections are crucial to maximizing the life of the system. 3M's DBRY-6 shown here are the recommended waterproof connectors for FX fixtures. DBRY-6 connectors are available directly from FX Luminaire in bulk packs - Bulk 100 connectors (**DBRY100**) and 25 connectors (**DBRY2X25**).

Installation Instructions

1. Strip wire insulation 3/4"
2. With wire ends even, insert wires into the connector and tighten until secure
3. Insert the connector all the way into the tube until the connector rests on the bottom
4. Fold the wires into the channels
5. Close the cap

2. LL LED Under Water Light optional cable lengths

The LL/LP LED Under Water Light comes with a standard 30' cable. An optional 100' cable is available.

The optional 100' cable for the LL LED Under Water Light is specified with a "100" at the end of part number. For example, LL1LEDBS100 or LP1LEDBS100 indicates a fixture with a 100' cable

With any low voltage lighting system waterproof connections are crucial to maximizing the life of a system. The 3M's DBRY-6 shown here are the recommended waterproof connectors for FX fixtures.
