

By day or night, the simple lines of the TD add elegance and function to any landscape. Precision milled from solid brass and copper to strict tolerances, this pathway light transcends momentary style trends. The TD emits a large elliptical light pattern that projects 2' (.6m) behind the fixture, 16' (4.8m) forward and 12' (3.6m) wide, but no higher than knee level. When mounted in lacy leaf plant material, the TD creates a mini-moonlight effect which allows the foliage shadows to dance on the walkway with the evening breeze.

TD: Path Light

One of a Kind
Copper will patina in an unlimited array of natural earthtone colors. In the desert, a penny brown is common, on the coast, a blue or mossy green can occur. No two fixtures produce the same patina, which gives copper and brass a one-of-a-kind look like any plant or garden element.
