

The FX Luminaire DR is one of our most popular path lights. The oversized top keeps light directed downward for controlled pathway and plant illumination without objectionable glare. The DR is constructed from die-cast aluminum alloy, and the riser is milled from solid T-6 6062 aluminum alloy for corrosion resistance and strength. The DR incorporates a halogen lamp assembly for high output and long life, reducing operating and maintenance costs.

DR: Path Light

Rugged and Timeless

Specify the DR-20-12R for most residential applications. For commercial sites, the higher output DR-35-12R is a great choice. The DR can stand up to punishment and is component-based for easy repair, making it perfect for high-impact environments.
